

REGENERATIVE BLOWERS

Ring Compressor

Inlet Filters & Covers

Inlet Filters

These filters are designed to protect the Fuji Ring Compressor by filtering the inlet air when the blower is being used for pressure applications. The filter has a perforated metal outer cover and an inner line wrapped with a fine (.009) mesh screen. The filter is rated for 200 micron filtration.

Inlet Filter Covers

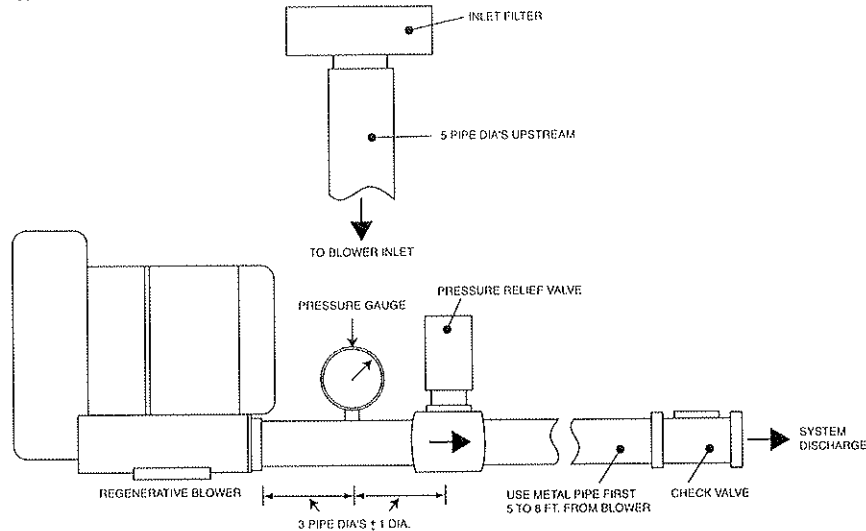

These covers are designed to fit over the inlet filter in order to provide better filter protection. They are made of 100% polyester fibers, are approximately 3/4" thick, and are rated 80% efficient at 25 microns.
